3—1　根据立体图所表示的物体形状,找出对应的三面投影图。

①

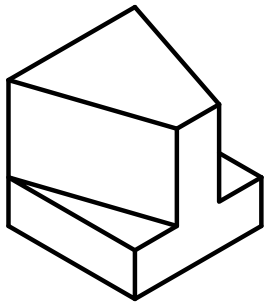

②

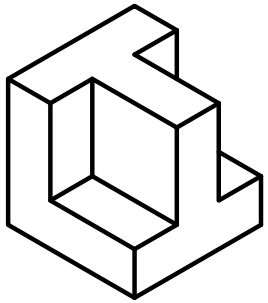

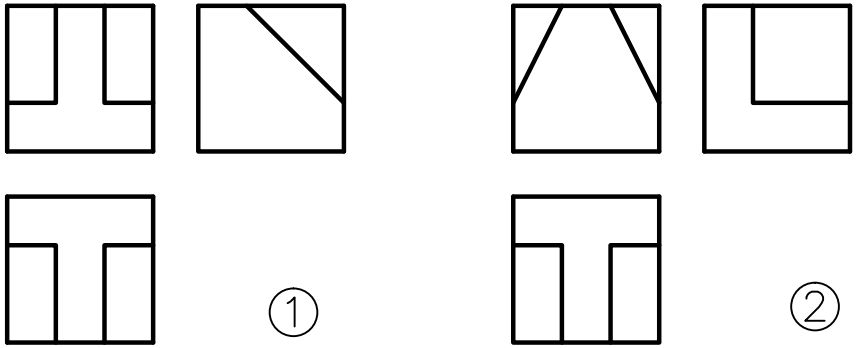

⑥　④

③

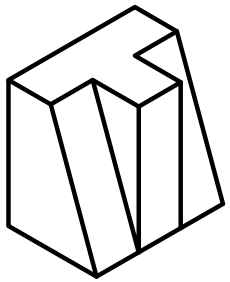

④

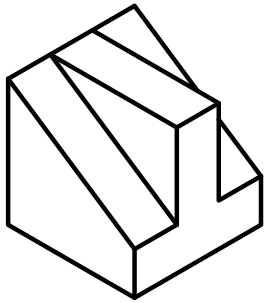

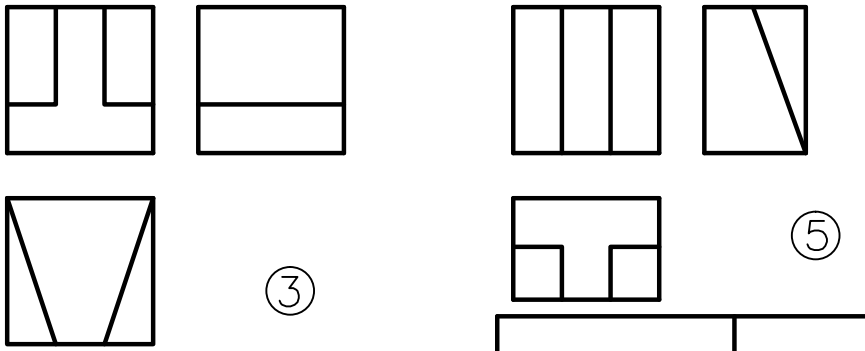

①　②

⑤

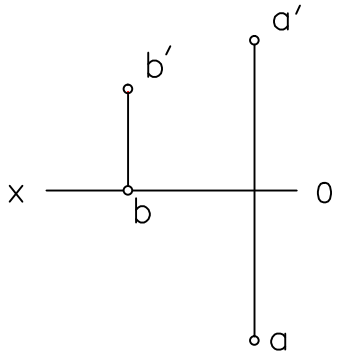

⑥

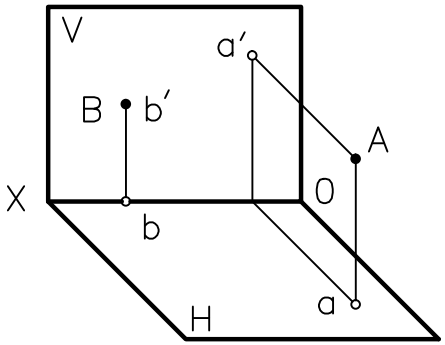

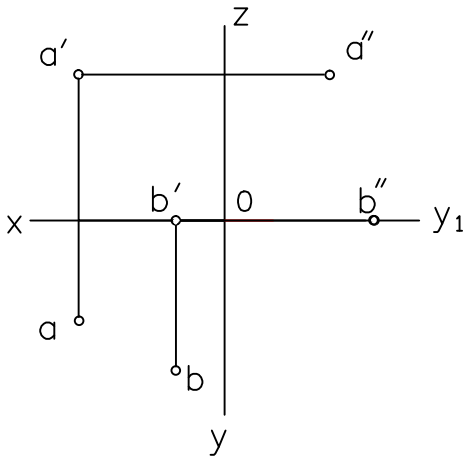

③　⑤

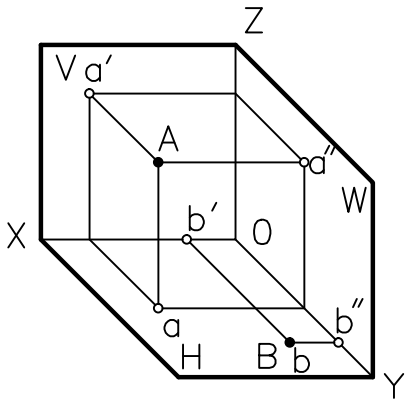

3－2　已知各点的空间位置，求作投影图，并填写出各点到投影面的距离（单位为mm）。

	H	V
A	15	15
B	10	0

	H	V	W
A	15	10	15
B	0	15	5

3－3　根据投影图，画出各点的空间位置。

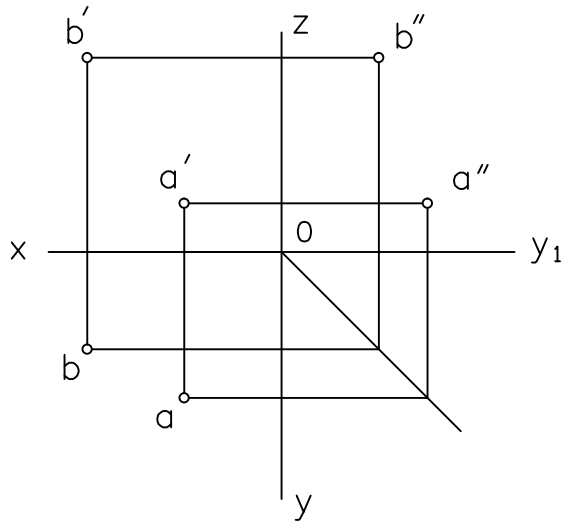

3－4　求各点的第三面投影，并填写各点到投影面的距离。

	H	V	W
A	10	20	20
B	5	15	10
C	15	10	0

3－5　已知各点的坐标值，求其三面投影图。

	x	y	z
A	10	15	5
B	20	10	20

3－6　已知A点的侧面投影，及X_A=25，求其另两面投影。

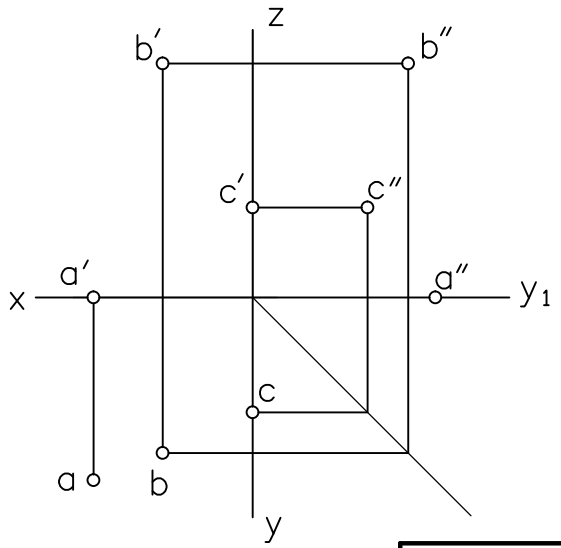

3－7　已知各点的三面投影，试填写其坐标值。

	x	y	z
A	15	15	10
B	20	0	20
C	10	20	0

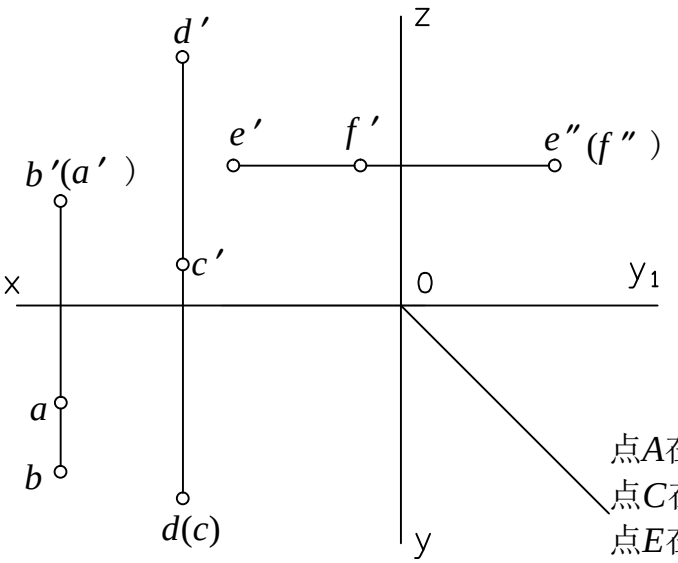

3－8　已知各点的两面投影，求作第三面投影。

3－9　已知A点的三面投影，并知B点在A点的正上方10mm，C点在A点的正后方14mm。求B，C两点的三面投影，并表示出投影的可见性。

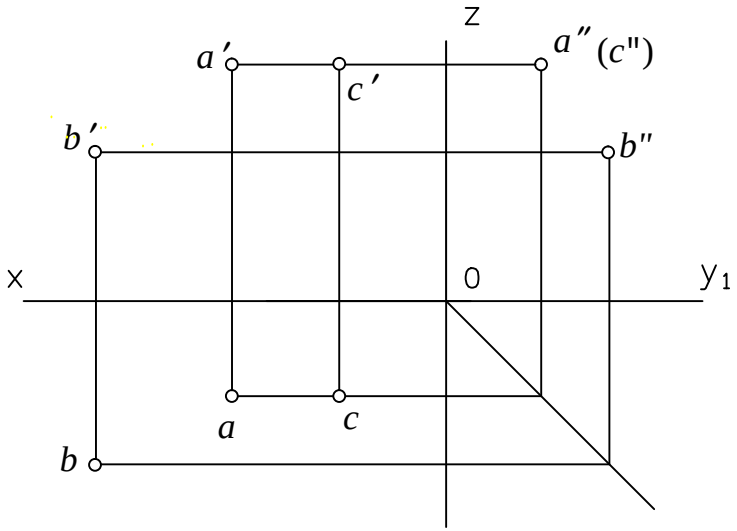

3－10　求各点的第三面投影，并比较其相对位置。

点A在点B正 后 方 6 mm
点C在点D正 下 方 20 mm
点E在点F正 左 方 13 mm

3－11　根据点的相对位置作出两点B、C的投影，并判别重影点的可见性。其中，点B在点A之左14mm、之前 7 mm、之下 9mm；点C在点A的正右方11mm。

3－12　在物体的投影图中，标出点A、B、C、D、E的投影。
